

Senior Biologist

1. MAIN GOAL OF THE FUNCTION

Under the responsibility of the Production Director, you will assume the following responsibilities and tasks:

- Manage on a daily basis all the analyses from patients associated with the OncoDNA's solutions and all projects in respect with the constraints of turnaround time.
- This includes all the technologies used to generate the reports;
- Ensure the communication between OncoDNA and various stakeholders (i.e. laboratory carrying out the analyses, distributors and CROs).
- Analyses of IHCs and NGS results (and others if trained and required);
- After a dedicated training, deliver comprehensive and correct reports to customers based on OncoDNA's solutions;
- Assist with customer complaints and investigation activities by providing necessary technical data and feedback to Sales Support, Product Management, Quality Assurance.

2. PROFIL RECHERCHE

Expertise (education, qualifications and training)

- You hold a bachelor or master in science
- You have competencies in oncology (knowledge in breast cancer is a plus)
- You have competencies in histology and histopathology
- Experience with NGS is an asset
- You have competencies in project management
- You have excellent organizational and communication skills
- You are stress resistant
- You are able to work with routine activities
- You are fluent in English (spoken & written); a second European language is an asset
